**Our next Sheep & Lamb Sale will be 7<sup>th</sup> of July, 2022 commencing at 12.30pm**

*Did you know...*

- In all the best ways, calves are a lot like kids! They're cheeky, and super playful. When they want to play, they will signal to each other with their tails and a special call — so that it's clear they mean no harm when mimicking the behaviour of adult cattle.
- Researchers now believe that music with a slow tempo reduces cows' stress levels. It seems that jazz isn't off the playlist just yet either though ...
- There are about 50 breeds of cattle in Australia, but did you know that you can't just breed any type of cattle in any area? Some cattle thrive in the warm tropical areas in the north of Australia and others prefer the cooler, more temperate climate in the south.
