Did you know?

The national sheep flock is currently estimated at 104 million.

Five sheep “experts” from around the nation used ABARE survey data together with their own knowledge to build a picture of a “typical” sheep farm for each of the 11 sheep regions across Australia.

The national sheep flock was dissected into five discrete production sectors:

- 1) Self replacing wool (SRW)
- 2) Self replacing meat (SRM)
- 3) Weather based (W)
- 4) Crossbred, and (XB)
- 5) Trading & Other (TO)
