**Did you know?**

Cows have with a visual field of 330° almost an all-around view. They can see the colours yellow, green and blue whereas red is hard to see for them.

The natural life expectancy of a cow is around twenty years. Some get up to 25 years old. The age of a cow can be determined by looking at its teeth. Also, the number of rings in its horns draws conclusions about the age.

Cows drink daily up to 100 litres.
